- A. **No pesticides or any other pest control materials or devices shall be given by the Contractor or their representatives to MDCPS personnel for any reason.** All pest control materials and devices used shall be applied, deployed, monitored and serviced by the Contractor in such a manner that they effectively eliminate the pest populations while not interfering with the health and safety of the facility occupants and routine operations of the facility. **If it becomes necessary to use numerous capture devices in an area to quickly harvest many pests, such as rodents, in a short period of time, the Contractor shall deploy these devices after operating hours and collect the devices early the next operating day before the area is occupied.**
- B. No aerosol or machine generated foggers, misters or space sprays of any kind shall be used at MDCPS facilities by the Contractor unless the Contractor submits written request prior to each intended use and written approval is obtained prior to each intended use from the MDCPS Pest Control Manager.
- C. No pesticide applications will be performed while the treated area is occupied by students. No pesticides will be applied to surfaces that can be contacted by students, such as tops and undersides of dining tables unless injected into cracks, crevices and inside hollow table legs. Inspections and evaluations of pest problems may be conducted while school is in session.
- D. All containers holding pesticides used in the treatment of MDCPS facilities shall be properly labeled with the name and strength of the pesticide product therein, as prescribed by law.

The MDCPS Pest Control Manager reserves the right to inspect the Contractor's chemicals at the time of application to ensure all chemicals are properly labeled, including manufacturer's recommended dilution and usage data.
- E. No materials and chemicals are to be stored by the Contractor at MDCPS facilities.
- F. No empty pesticide containers and excess pesticides are to be discarded by the Contractor at MDCPS facilities.
- G. Appropriate protective clothing and equipment consistent with the chemical manufacturer's label and MSDS recommendations shall be provided by the Contractor and worn by the Contractor's Pest Control Technicians during application.

- H. If the Contractor uses glue boards or other capture devices to control and eradicate a rodent infestation, the Contractor must receive permission from the Principal or administrator of that facility. The Contractor shall be responsible for said traps and the immediate removal from the normal operation in the area of placement. Traps shall be placed so that they are not visible to students, staff or other occupants. Glue boards can sometimes be placed inside of anchored tamper proof bait stations or sections of PVC pipes. When using capture devices for rodent control, the contractor shall provide the location and type of capture devices to the Principal or Food Service Manager. The information provided shall be schematic drawings or narratives indicating the location of the capture devices.

Glue boards and/or mechanical traps, in lieu of poisoned baits, should be used whenever possible to treat rodent infestations.

- I. No rodenticide baits or tracking powders are to be used at MDCPS facilities unless the Contractor obtains written approval for each intended use from the MDCPS Pest Control Manager.
- J. Rodenticide baits, when used, shall be in anchored and locked tamper proof containers and placed in areas not accessible to students and /or faculty. Rodenticide tracking powders, when used, shall be injected, using appropriate equipment, directly into rodent burrows and the burrows are to be covered with earth. Daily follow-up visits to the facility where rodenticide baits or tracking powders have been used are required.

If the Contractor fails to obtain written approval from the MDCPS Pest Control Manager, prior to using rodenticide baits or tracking powders, the Contractor shall be considered in violation of technical specifications. The MDCPS Pest Control Manager will notify the Contractor, in writing, indicating three (3) business days to correct the violation or face default.

- K. MDCPS reserves the right to obtain product samples at any time during application, to verify that the pesticide complies fully with the pesticides approved by the MDCPS Pest Control Manager. Refusal by the Contractor to provide such samples shall be grounds for default of contract.
- L. The Contractor shall not apply a water based liquid pesticide directly on or into the electrical component of any equipment. Furthermore, the Contractor shall not apply any aerosols, mists, ULV's or other space sprays into areas containing open flames. The Contractor shall not apply any pesticides onto table tops, food serving utensils or any other surface which comes in contact with food. The Contractor shall not apply liquid or other pesticides, which can volatilize onto any surface which generates heat, such as the inside surfaces of the baking chamber of ovens or inside the plenum spaces and hot plates of steam tables of serving lines and food conveyers.

If a technician applies a pesticide in a manner which is inconsistent with the label directions or these specifications, the technician will be prohibited from access to MDCPS property. The technician will be reinstated only after the Contractor submits documentation showing date(s) of training, subject (s) of training and test results to the MDCPS Pest Control Manager, verifying that the technician

has received additional training in the proper uses of the pesticide by a qualified trainer(s).

- M. If pest control materials must be applied to sites that contain stored items, such as food, utensils, paper goods, contents of desks and filing cabinets, and the stored items interfere with the proper application of the pest control material or risk contact by the pest control, then the Contractor shall arrange with the food service manager to remove the food, utensils and/or other stored items and clean the area prior to the application of the pest control materials.

11. TECHNICIAN CREDENTIALS :

- A. Contractors' technicians conducting on-site treatments and Inspections must hold current, valid company identification cards issued by the Florida Department of Agriculture and Consumer Services, Bureau of Entomology and Pest Control. The Contractor shall provide a sufficient number of competent, trained and properly equipped Technicians, certified Operators and support personnel to provide the standards of service to effectively monitor and control the pests at all locations included in this contract.
- B. Over the term of this bid, any additions and/or deletions of personnel on the above items must be submitted to the MDCPS Pest Control Manager prior to servicing any MDCPS Facilities. During the course of this contract and any renewals thereof, when the business license and identification cards expire annually, the Contractor shall submit copies of the current renewals of the business license and identification cards for each employee performing work at MDCPS facilities.

- 12. PESTICIDES LABELS AND MATERIAL SAFETY DATA SHEETS:** After approval of the pesticide list, the Contractor shall supply to each facility, the Specimen label and MSDS for each pesticide that is actually used at that facility. If available, the "end-use dilution" MSDS shall be supplied to the facility. This information shall be provided on letter-size (8.5 inch by 11-inch) format. This information shall be supplied to the Cafeteria Manager, Principal, Site Administrator or their assigned designees as specified for the Inspection/Action Reports. The provided labels and MSDSs shall match the materials included in the Inspection/Action Reports required to be provided at each service. Each label and MSDS need only be supplied once to each facility, provided no subsequent changes have occurred in the labels or MSDSs.
- 13. CONTRACTOR'S EQUIPMENT:** MDCPS shall not be responsible for the loss or damage to any equipment, pest control materials or devices belonging to the Contractor.
- 14. MDCPS RESPONSIBILITY:** The failure of MDCPS to implement the Contractor's recommendations to upgrade sanitation, make repairs or modify personnel practices shall not relieve the Contractor of its requirements in this contract.
- 15. DEFAULT OF CONTRACT:** Continued infestations of included pests in any facility specified herein shall be reasonable grounds for contract default.

- 16. SERVICE REPORTS:** All service reports must be legibly printed. The Contractor's technician must leave two (2) copies of the service report with the Food Service Manager and follow the other billing instructions per bid specifications.
- A. All service reports must have specific details of the condition of the school site [i.e., structural (holes in the wall and ceiling, peeling paint, door sweeps and insect fans), sanitation, work habits] etc.
 - B. Reports which include documentation of any type of pest infestation must be faxed or delivered within 24 hours to the designee at the Department of Food and Nutrition.
 - C. If a report reflects an infestation of pests, then the school site must be serviced at a frequency required until infestation/problem is resolved.
- 17.** The designee at the Department of Food and Nutrition will supervise the bid and all communication regarding food service school site pest situations. If needed, designee will direct the pest control company to contact the Department of Safety, Environment and Hazards Management, School Principal, Food Service Manager and any other related personnel to resolve any situations at the school site.
- 18.** Areas of the school, other than the food service area that are infested with pest activity, may be given an estimate for service to eliminate the situation (If requested by the Principal). The cost on this service will be submitted to the principal at the time of inspection. Additional cost for treatments and/or service to the school facility other than food service area will be the sole responsibility of the principal and/or designee at the school site.
