Enterprise IT Security Solutions

Business is rapidly changing and the needs of your organization require a responsive, flexible and dedicated business partner. GigaNetworks’ unique value in the Value Added Reseller (VAR) market is that we are actively involved in the pre-purchase and implementation, as well as in the post-sales and ongoing evaluation processes.

With a wide footprint, GigaNetworks is considered by many as the local go-to advisor and provider of security, networking, and wireless solutions from industry-leading vendors, which include:

Symantec  Carbon Black  IMPERVA  Apcon  ARISTA
FireEye  aruba  Centrify  thycotic  SentinelOne
FORTINET  RAPID7  ForeScout  algosec  REDSEAL

GigaNetworks will:
- Help evaluate your security needs
- Manage your security solutions
- Create and detail upgrade plans
- Serve as your trusted security advisor

Whether your company needs a network topology review, security profile assessment, or assistance in implementing and managing a solution, GigaNetworks is there to help.
